

KEEP FATS, OILS, AND GREASE OUT OF YOUR DRAIN.

Prevent Sewers Backups. Fats, Oils, and Grease. These substances should be disposed of carefully, as they can form into large, thick grease balls that create sewer system blockages.

Blockage and overflows caused by F.O.G.s can lead to health hazards and property damage, threaten the environment, cause slow drainage, and disrupt your homes.

WHAT CAN YOU DO?

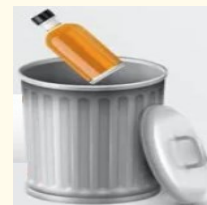

1. Do not drop fats, oil and grease into the drain.

2. Scrap it, let it cool, then wipe and scrape it off into trash.

3. You can also pour them in containers

4. And put them in the Garbage all sealed.

NEVER POUR FATS, OILS OR GREASE DOWN THE DRAIN
